Office Action Summary

Art Unit: 1761

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17 and 35-46, drawn to a cabinet assembly for holding food products, classified in class 126, subclass 33.
- II. Claims 18-34 and 47-51, drawn to a method of storing food products, classified in class 426, subclass 418.

The inventions are distinct, each from the other because:

Inventions I and II are related as an apparatus and a method for using the apparatus. The apparatus as claimed in Group I can be used in methods other than that recited in Group II. For example, the apparatus could be used in any method that requires humidity and/or heating including processes dealing with inedibles and not just foods as recited in Group II. For example, the apparatus could be used to germinate seeds, maintain tobacco moist, incubate eggs or even as autoclave for medical equipment.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
